

REPLACE THIS LINE WITH YOUR PROPOSAL TITLE

The recommended sections for a *TESS* GI proposal are shown below. Feel free to change section headings as necessary, but this is the suggested minimal information that should be included in the proposal. This Science/Technical section of the proposal is limited to 4 pages for small programs, and 6 pages for large and key programs. Figures are included in these page limits, but references and a (sample) target table are not included in these page limits.

Note that the Phase-1 proposal review will be dual-anonymous and follow the guidelines listed below:

- Proposals should eliminate language that identifies the proposers or institution, as discussed in the Guidelines for Anonymous Proposals.
- PIs are required to upload a one-page Team Expertise (insert link) PDF through a separate upload when submitting the science justification into ARK/RPS.
- Proposals that do not follow these dual-anonymous guidelines may be returned without review.

1 Introduction

Summarize the problem being addressed and give an overview of how your investigation will help. Why *TESS*, why now?

2 Scientific Justification

Provide text and figures that justify the scientific need for new *TESS* observations and analyses here. When applicable, justify your choice of new 2 min or 20 s cadence observations. If you will be making use of the 200 s FFIs for your research, make it clear why the *TESS* FFI data are suitable for your science. If your program includes theoretical, simulation, or ground-based observing components, describe why these efforts are critical.

3 (Only For ToO Proposals) Trigger Criteria

If the proposed investigation includes Targets of Opportunity (ToO's), describe also the circumstances under which a ToO is triggered, an estimated duration of the event(s), and an estimated probability for triggering the observations. Also discuss the potential science impact imposed by the delay in upload of the event due to *TESS* orbit/uplink constraints.

4 (Only For Joint *Swift* and/or *NICER* Proposals) Need for Joint *Swift* and/or *NICER* Observations

Fully justify why you are requesting joint observations with *Swift* and/or *NICER*. You must specify how much time you are requesting on these additional facilities.

Note that *TESS* GI funding is available to successful U.S.-based investigators who request *Swift* and/or *NICER* observing time through the *TESS* GI process. No funds will be awarded from the *Swift* and/or *NICER* project for joint investigations proposed to this *TESS* program element.

5 Analysis Plan

Discuss how you plan to analyze the *TESS* data (or for ground-based observing programs, the data collected). This includes the development of software tools.

6 Technical Feasibility

Provide text and figures showing that the proposed *TESS* investigations are feasible; consider the *TESS* survey strategy, target observability, and required signal-to-noise, etc. The *TESS* Science Support Center (TSSC) makes several tools available to help estimate these quantities. For ground-based observing focused programs, a description of the resources that will be used should be described here.

7 Expected Impact

Summarize the expected science return of the proposed investigations and the expected benefit to the community, including new data products and software tools to be made publicly available.

8 Work Plan

Provide a brief (1 paragraph) anonymous work plan that provides details on how the proposed effort will be carried out, including the allocation of effort amongst investigators. For example: “Co-I #1 will extract the light curves. The PI will mentor a graduate student to model the light curves. Co-I #2 will lead the collection of ground-based observations.”

All proposals requesting funds must also provide upon submission a bottom-line proposed budget number in the provided field of the ARK submission form; this number should not be included in the body of the proposal.

9 References

List of references. References *are not included* when considering the proposal page limit. References in the text should be in the number format, and in the references list as:

[1] Person A, Person B, Person C, et al., 2016, *ApJ* 200, 231, 2

[2] Person D & Person E, 1912, *Nature* 495, 452

10 Target Table

When necessary to justify your proposal, provide a list of targets using the below example as a template for format. This target table is designed to aid reviewers and need only provide a representative sample of the complete target list uploaded to RPS. Full target tables should be

submitted electronically with the Phase-1 proposal. Please limit any target table included here to only 1 page. The table is not included in the page limit of the Science/Technical section.

TIC ID	Common Name	RA (deg)	Dec (deg)	TESS mag	Obj. Type	Comments
388857263	Prox Cen	217.428793	-62.679592	7.36	M dwarf	2 min cad., RV planet
353622691	BL Lac	330.6803807	42.2777717	13.1	AGN	20 s cad.
